SUMMARY

- A motivated developer with hands-on experience in software, web, and mobile application development through academic and project-based work. Possesses working knowledge of C++, C#, Java, Python, SQL, HTML, CSS, JavaScript, and PHP, with practical experience in React Native, Android Studio, and MIT App Inventor. Eager to apply technical skills in a professional environment, continuously learn, and contribute effectively to team-based projects.

EDUCATION

Bachelor of Science in Information Technology - Software Engineering

2022 - 2026

- Trinity University of Asia, Quezon City | **Summa Cum Laude**

SKILLS

TECHNICAL SKILLS

- **Programming & Markup Languages:** C++, C#, Java, Python, SQL, PHP, JavaScript, HTML, CSS
- **Frameworks & Libraries:** ReactJS, React Native, NextJS, Laravel
- **Database Management:** MySQL, PostgreSQL
- **Mobile Development:** React Native, Android Studio, MIT App Inventor
- **Version Control & Tools:** Git, GitHub, Docker, Visual Studio, Visual Studio Code, Postman
- **UI/UX & Design Tools:** Figma, Canva
- **Cloud & Backend Services:** Google Cloud Platform (GCP), Firebase
- **System Modeling & Business Design:** ArchiMate (Business & ERP Modeling)
- **Productivity Tools:** MS Word, Excel, PowerPoint
- **Basic Computer Troubleshooting**

SOFT SKILLS

- Problem-solving, Analytical thinking, Team collaboration, Communication skills, Time management, Adaptability, Willingness to learn, Attention to detail, Receptive to feedback

CERTIFICATIONS AND PARTICIPATION

CERTIFICATIONS AND TRAININGS

- AI and Automation Webinar – PynetLabs (2024)
- Cybersecurity Training Level 1 – College of Engineering and Information Sciences, Trinity University of Asia (2025)
- Information Technology Specialist (ITS) in **Java** – Certiport (2026)

PARTICIPATION & LEADERSHIP

- UMAK IT Skills Competition (Java Category) – Participant (2024)
- College of Engineering and Information Sciences Local Council – Treasurer (2024–2025)

WORK EXPERIENCE

SOFTWARE DEVELOPER INTERN – INTERNATIONAL ACADEMY MANILA (FEB 2026 - APR 2026)

- Contributed to the development of a full-stack academic management system for International Academy Manila and St. Anthony Mary Claret College.
- Developed web and mobile school portal applications using ReactJS, React Native, PHP, Node.js, and PostgreSQL.

NOTABLE PROJECTS

- **International Academy Manila (IAM) School Portal (2026)** - Contributed to the development of a full-stack academic management system for both web and mobile platforms. The web application was built using ReactJS (frontend) and PHP (backend), while the mobile application was developed using React Native (frontend) with Node.js (backend). Both platforms share a PostgreSQL database, supporting centralized and efficient management of academic data and school operations.
 - **Claret College School Portal (2026)** - Contributed to the development of a full-stack academic management system similar in scope to IAM Portal, supporting both web and mobile platforms. The web application was built using ReactJS (frontend) and PHP (backend), while the mobile application used React Native (frontend) with a Node.js backend. Both platforms were integrated with a PostgreSQL database to ensure consistent, centralized management of academic and administrative data across systems.
 - **LGU OJT Monitoring System (2026)** - Designed and developed a comprehensive web-based OJT Monitoring System. Built with ReactJS, PHP, and MySQL, the application features precise geolocation-based time tracking for interns and automated PDF report generation for administrative monitoring.
 - **TUA Marketplace (2025)** - Designed and developed a campus-exclusive web-based online marketplace for Trinity University of Asia using ReactJS, PHP, Python, MySQL, Firebase, and Google Cloud Platform, featuring secure Google authentication, product listings, real-time messaging, and AI-based recommendations.
 - **Mini-Binance Web App (2025)** - A full-stack cryptocurrency exchange simulation built with Laravel 12 (PHP 8.2) and React + Vite + TailwindCSS.
 - **Blockchain Web App (2025)** - A simple blockchain simulation built using React (frontend), Laravel (backend), and PostgreSQL (database).
 - **TUA OJT Monitoring System (2024)** - Designed and developed a multi-platform internship monitoring system featuring a C# Windows Forms desktop application for administrators and an Android mobile app for students, with QR code attendance, secure logging, and MySQL integration.
 - **Weight Up! (2023)** - A fitness app made with MIT App Inventor for Android that allows users to track their weight, upload progress photos, and calculate their BMI with a built-in calculator.
-
